Postscript and DGN formats are also supported by the application. In addition, AutoCAD also supports AutoLISP scripting. AutoCAD uses AutoLISP as its language for extension, providing syntax similar to BASIC, but with some minor differences. On Microsoft Windows platforms, AutoCAD provides two programming languages for its extensions: AutoLISP, a development tool for AutoCAD since the 1990s, and VBA, part of Office since Office 2000. AutoLISP is documented in AutoLISP Reference. VBA is documented in Microsoft Office VBA Help. Microsoft Excel's macro language Macro is also accessible from AutoCAD and is documented in Microsoft Excel Macro Language Reference. Before the release of AutoCAD 2013 and 2014, AutoCAD natively supported the NET Framework. AutoCAD 2016 introduced support for the.NET Framework 4.5 (client side) and the.NET Framework 4 (server side). The.NET Framework is documented in Microsoft.NET Framework. AutoCAD AutoLISP AutoCAD's original extensions (which share the same name as the AutoCAD product family) were written in AutoLISP (AutoCAD Language for Extensions), a limited version of Lisp, which can be used to create extensions. Since AutoCAD 2007, all AutoLISP extensions are built using the Visual LISP Builder tool. Some AutoLISP developers have chosen to use Visual LISP for writing AutoLISP extensions due to the performance of the Visual LISP Builder Tool. AutoLISP is documented in AutoLISP Reference. AutoLISP extensions are written in the AutoLISP scripting language. the language is based on the Scheme language. The AutoLISP language has a number of extensions and

functions to enhance the AutoLISP language. AutoLISP can read and write other file types (XML, DGN, DWG, DXF, etc.), but only files of the native AutoCAD types (.dwg,.dxf,.dwgx, etc.) can be opened. AutoCAD architecture In addition to being used as a language for extension, AutoLISP is used to develop some AutoCAD commands and utility functions. These commands are stored in a DLL file, which can be used as a scripting object. a1d647c40b
