In 1990, AutoCAD was first released for the Mac, making it the first mainstream professional CAD program on a PC platform. AutoCAD is widely used for architectural design and drafting. It is one of the more popular CAD packages in use today, with an estimated 150,000 CAD designers and draftsmen using it worldwide. AutoCAD is produced and sold by Autodesk, an American corporation based in San Rafael, California. The following is an overview of AutoCAD's features. For more details, see the AutoCAD user guide. Video streaming is a continuous real-time delivery of video content from a source such as a streaming video server to a client over a communications channel. Streaming video may include a video sequence as encoded or encoded and decoded video frames. Streaming video may be packet-based, and may involve storing encoded video frames in a buffer or in temporary memory, while the data is transmitted from the streaming video server to the client. It is desirable to efficiently and reliably stream video in a manner that provides a minimum of quality degradation to the received video.Influence of objective criteria on the diagnosis of rubella-induced congenital disease. To assess the diagnostic impact of objective criteria, stored sera of 424 German patients with laboratory-confirmed congenital rubella were examined with respect to a history of exposure to rubella. The objective criteria used were IgM- and IgG-antibodies, CPE, anamnestic antibodies, and documentation of contact to an infected child. CPE and anamnestic antibodies were found in 81 and 94% of the patients, respectively. Corresponding a1d647c40b
