Make every drawing count with machine learning: Tackle complex drawing projects with machine learning in AutoCAD® and Autodesk® 360 to apply machine learning-based editing and drawing automation, as well as predictive annotation. See what's new in AutoCAD 2023 in the video below. 1. Markup Import and Markup Assist Make design change more efficient. With AutoCAD Markup Assist, you can import and incorporate real-time feedback directly into your design from PDFs and paper prints, adding change annotations and notes directly to your drawing, and they can be integrated into existing layers. Markup Assist is a feature of the 2D Plotter, which is part of the 2D New Interactive Environment that uses AutoCAD 360 to enable a new class of CAD collaboration. You can apply Markup Assist to any layer within the 2D interactive plotter, and you can switch to another view by selecting the Interactive view from the View menu. You can also import images from PDFs, directly from the 2D interactive plotter. Markup Assist uses the Autodesk® Markup Engine. The engine automatically interprets PDF and print files, and the annotations from the print or PDF are reflected on the screen as you add them to your drawing. You can change any annotation as you make edits to the drawing. Markup Assist can be applied to multiple
