This is the best thanksgiving dessert recipe I've been able to find so far and I've been using it since I was in college. It's so easy and has tons of flavor! In a double boiler or in the microwave, melt the chocolate (or cocoa powder). Once the chocolate is melted, add the rest of the ingredients and stir until thick and smooth. Add the nuts to the mousse and refrigerate until firm (or cool completely).

Ingredients: 3 Tbsp. flour (all purpose) 2 Tbsp. sugar (white or brown) 1/2 cup (1 stick) butter 1/2 cup chopped walnuts 2 eggs 1 tsp. vanilla extract 4 cups vanilla ice cream 1/4 cup marshmallow creme 2 cups milk chocolate chips

Instructions: Combine the flour, sugar, and butter in a heavy-bottomed saucepan and cook over low heat, stirring frequently, until the mixture turns a light golden brown. It will continue to cook and turn a darker brown color as it cools. Remove from the heat and stir in the nuts. In a medium bowl, beat the eggs until light. Add the vanilla and mix well. Add to the brown mixture and stir well. Refrigerate until thick. With a heavy-duty mixer or an electric beater, beat the ice cream until smooth. Add the marshmallow creme and beat well. Fold the mixture into the brown mixture. Refrigerate until set and smooth. Melt the milk chocolate in a double boiler or in the microwave. Pour the mixture over the ice cream, folding well. Spread in an 8x8 or 9x9 baking dish and refrigerate until firm. Cut into squares to serve.

Like a healthy diet, it's beneficial to develop your bodybuilding routine a healthy and balanced one. Eating
