KEYMACRO is an easy-to-use program for generating macros in MS-DOS, Windows, or Linux with 4 different languages. The program runs under Wine on Linux. It is a small program, with four main functions: - generate macro files (.inf) and macros for Windows, Linux or MS-DOS - create standard or customised macros - convert any Linux/DOS text into a complete Windows program, or vice versa - create macro scripts (.msc) The program uses an easy-to-use and intuitive graphical interface to perform all of the above functions. It doesn't have any registry settings, and it uses 32bit.NET Framework to create the macros. Key Macro Creator consists of 5 files: 1- Constants.dat This file contains all of the constants that you can use in macros. You can add new constants or edit old ones. For example, you can edit the ENTER, BACKSPACE, DEL, CTRL, ALT, SHIFT and other constants. 2- General.dat This file contains general settings. You can change the program title, the program name, the program icon, and the program shortcut. 3- The simplest and most important file is Commands.dat, which contains all of the macros you can use to create macros. 4- MakeBatch.bat The file used to run your macros. 5- The Help file.txt. It contains useful information, such as tips on how to use the program. It also contains information on how to install/uninstall the program. Key Macro Creator works on most of the Microsoft Windows operating systems, including Windows 95, 98, ME, NT, 2000, XP, Vista, 7 and 8. It is compatible with most of the applications, including Notepad, and Microsoft Visual C++ 6.0, 2003, 2005, 2008, 2010 and 2012. Main features: - Generate macros for Windows, Linux or MS-DOS - Create customised macros - Convert any Linux/DOS text into a complete Windows program - Create macro scripts (.msc) - Create standard or customised macros - Unicode support - Easy-to-use interface - No registry settings - Auto-save feature - Help file - Recycle bin - Minimize and close the program at will - Automatically saves the changed files - Compatible with all versions of the Microsoft Windows operating systems - Compatibility
