Additionally, it is not possible to add more colors to the notes, nor to personalize them with the name of the person who created them. All in all, we could not see any of these missing features as a problem, and we considered them a rather interesting new feature for a simple sticky note app. Vov Sticky Notes is a quite basic sticky notes app, but it does not lack some interesting features. However, it is not possible to set different types of notifications, nor it is possible to personalize the notes.
