The last AutoCAD release with an internal database was AutoCAD LT 2016 for Windows. In late 2017, Autodesk discontinued AutoCAD LT, choosing instead to focus development efforts on AutoCAD, and leaving AutoCAD LT for the end-user community to carry on in development by third-party developers. In May 2017, Autodesk also released the Developer Edition, a lower-cost version of the software designed for development and testing purposes. It allows users to work in the software without having to download a database, and features simplified user interface elements and a basic programming language. Introduction AutoCAD is a commercial desktop application for creating 2D architectural design drawings. Developed and marketed by Autodesk, it is used by architects, engineers, contractors, and other professionals to design objects and develop plans. Product description AutoCAD is used for architectural and engineering design, construction, and presentation. It can be used for design concepts as well as building construction. AutoCAD enables the designer to explore a design problem, develop a solution, and document it for others to use. AutoCAD provides an easy-to-use and intuitive interface for creating plans and drawings. Using AutoCAD There are three main ways to use AutoCAD: Fully integrated Online For Windows, macOS, and Linux Fully integrated A fully integrated solution provides the most direct access to all tools and features of the application. A desktop publishing system, such as Adobe InDesign or QuarkXPress, is most frequently used in conjunction with AutoCAD. The desktop publishing system displays AutoCAD as a drawing window or can function as a windowless drawing application. For example, a Windows-based desktop publishing application would use the operating system's default graphics system to render AutoCAD, which would then provide the graphics for the resulting printouts. Other desktop publishing systems may provide a custom AutoCAD user interface. Online A cloud solution is an online offering where CAD data is stored on the cloud and shared between multiple users for online work. It is intended to provide user collaboration, better control, and up to several gigabytes of storage. A cloud solution can be accessed from any computer with an Internet connection, as long as the cloud solution is installed and is running in the background. On Windows

What happened: "The Asian giant's largest e-commerce platform, Taobao, reported it had lost an unprecedented amount of money from January to March, as China has struggled to contain the coronavirus outbreak," the FT reports. What you need to know: "The platform said its net loss rose to more than 500 million yuan ($76 million) in the first quarter, compared with a net profit of 31 million yuan in the same period a year ago," the FT writes. Why it matters: "Taobao is a source of hard data on China's retail market that is rarely published," the paper adds. The platform's poor performance shows that "investors are nervous about the health of China's second-biggest economy, which is expected to have a $3.5 trillion impact on the global economy when it finally emerges from its strict lockdown." The big picture: The $20 billion of lost wealth is equivalent to over one-third of the Chinese Communist Party's (CCP) economic plan for 2020, the FT writes. "We have seen a1d647c40b

Pages Gospel on 2nd Sunday of Advent In this section of the Message, Jesus urges his disciples to be prepared, even "ready," for his Second Coming. He will bring justice, and relief from the crushing burden of the law. In addition, God will take his children home, and his judgment will fall on those who reject him. John's Gospel is the record of Jesus' return to his disciples after his Ascension. He will come again, for he has promised to return, and this time he will fully vindicate the community and restore its life. His coming marks the end of the old world and the dawn of the new. It is a hope that begins to take shape in the Old Testament, and grows richer in the prophets and in the writings of the apostles. Jesus' return comes after the Passover; he had said, "I will come again and take you to myself; in that day you will know that I am in my Father, and you in me, and I in you." (Jn 14:21) When Jesus comes again, he will not deliver Israel from exile and death. Nor will he usher in a new kingdom of heaven. Rather, he will take us to himself, and into the presence of God. The reign of the Lord will last forever. His presence in heaven and our hearts and homes will mark the end of the old world, and the dawn of the new. Our text tells us that the disciples should be ready for Jesus' coming, even "ready." They should have received the news about him, and the great change he brings. They should have gone out and proclaimed the good news to the people, and lived in light of Jesus' imminent coming. But the Gospel tells us that we cannot know when the day of the Lord will be, or when he will come again. So what does this text do? It
