It's time for a whole new experience of your computer desktop. After having a glimpse of the world from above, you are now in a position to admire the planet Earth. This theme is a faithful attempt to reproduce the view of the Earth from space. The desktop is made up of a beautiful spiral, with the picture of the Earth on it. The view is exactly the same as if you were in space: you will see the Earth as if from the air, with the clouds moving and the sunset turning purple. The desktop was created with a background image from an aerial photo made by the European Space Agency (ESA) in the year of 2001. You will see a total of 13 image layers. A lot of work went into designing the desktop, and a lot of work was still left to be done. However, what you see now is already a big step forward. The desktop was made with a complex shading layer. It's a lot of work to make the desktop appear that realistic. Another important part of the desktop is the Blush color. This color has been selected to fit the theme as perfectly as possible. *** Enjoy: *** Please contact me for any issues you might have. I hope you will enjoy the theme as much as I did creating it! And I'd like to ask you to rate and comment the theme as well. Enjoy:) The Incredible Adventures of Professor Fink 10/19/2014 The Incredible Adventures of Professor Fink is an exciting adventure game for Mac OS X.
