What's New In?

honestech VHS to DVD Deluxe is a neat application that can capture videos from old VHS analog cassettes, then burn them to digital DVD or Blu-ray discs. If you have VHS content that is too important to risk losing, as in time videotapes can deteriorate, they will have color

bleed, white specks, and other distortions; you can give this tool a try. honestech VHS to DVD Deluxe comes with a Video Capture device that connects to your VHS player and laptop/PC and works as a bridge for video migration.

Furthermore, the app can capture video from old VHS, 8mm's, camcorder tapes as well as high-definition videos from HDV camcorders. You can also add various special features including background music. Also, you can enhance old videos with different effects and filters, and create

custom menus. Background music is another tweak that the app can perform, allowing you not only to save the videos but also to improve them. Another feature is recording audio only, snagged from cassettes, LP record, and videotapes. In conclusion, this application is suitable for people with a large collection of VHS tapes that need to transfer the content to a modern storage space, in order to avoid deterioration or even complete loss. "It's been a long time since we have uploaded any videos from UK's best manufacturers to YouTube

and/or Dailymotion, our present YouTube and Dailymotion is not enough to cover all products from the market. In the current YouTube and Dailymotion, the videos are still in the originals and it is not easy to make videos from VHS tapes. However, this application helps to capture videos from VHS tapes into various digital format such as MP4, MOV, M4V, AVI and then transfer them to daily motion and YouTube. In the end, you can just enjoy the videos on your mobile phone, PC or Mac without worries of deterioration."
