CroQ: Dynamically creating tabs in another page Okay, so I am working with two forms, one is the profile form, which consists of the basic things you would expect to see, name, location, etc.. and the other is a chat where the user can message other users. When I login to the chat, I would like to have it so that there are multiple tabbed section to be created for each user. Is there any way to do this with JavaScript, or would I need to do this via PHP? A: Use jQuery's tabs(). \$("#tab container").tabs(); d0c515b9f4
