At first glance, a lot of what makes Railroad Tycoon so special seems to be missing. You don't get people working for you, no one is dependent on your railroad company to survive, nor are they reliant on your railroad company to support them. And the payoff is, of course, in your success, in your total domination of the region. There's no real feeling of victory beyond that. If you think you've done well, then congratulations, you've done well, but no one will know. The people on the train will not even be aware that you've done it, but they'll be grateful that you'll allow them to work at your standard of living. No one is going to know if you've fucked them over, but they'll be grateful that you've given them a job. Railroad Tycoon is a game that rewards you for systematically exploiting a region of people with two very basic aspects: efficient and non-alienating management. It's the kind of game where you can basically do whatever you want with the small, or rather, I should say, the big picture in mind. There are no nations, no national leaders, and there are no drivers. You don't have to worry about the integrity of the railroad company, not really. No one has to know that you're doing this. You can be the most ruthless and uncompromising asshole and people will still be fine with it. That's the beauty of the game. It doesn't matter if people in the business of one region know that you're systematically making certain groups of people disappear because they get in the way. The second aspect is, in fact, the main focus of the game. The second aspect is that, despite the huge expansion of the railroad game in the history of games and the multiplicity of themes available, the mechanic is remarkably simple. It's a simple puzzle of paths that can be joined and nodes that can be connected. As long as it makes sense. It is, in fact, also a puzzle of extreme difficulty. Given how much money can be earned, and thus how much freedom of movement is given, it's not uncommon for a railroad company to have a full roster of at least twenty five drivers on board, and that roster doesn't include the weekend track workers, the trainers, the DPM (Destination Planning Manager), the passengers and much more. You can have, for instance, 10,000 people on board. Ten thousand people. If you have

What's new in SHUT IN:

There were not horses or people on the road for miles. The only vehicle on this muddy dirt road was a beat-up Ford pickup truck. There were no banners with mandalas painted on the hood; there were no talk of white female warriors; there were no spirals or mushroom clouds here. The truck was idling in the middle of the road. Its engine was running, but the truck was dead. The driver climbed from the cab, opened the bed, and poked something at the truck's exhaust pipe. When he looked up, his face was dark and dirty. He seemed to be reaching back in time in his head. There was so much emotion on his face he reminded me of Dan Olsen, standing atop our desk at my old high school in 1956, when he failed his AP math class and would never take another. I walked to the curb, upset that nobody was driving this route. Did the island gods mean for this truck to bring me to Point Diamond? What was I doing here, on this abandoned roadside, four days after the day before Thanksgiving? "My radio antenna broke when the wind blew it over the ridge from Hoboken to our subdivision," said the driver." I didn't know they were supposed to last that long." He was sitting on his tailgate in a slick grey down jacket, wearing a baseball hat that said "Streaky the Horse." "Hi, I'm Joa," I said. "Who are you?" "Warren. This is my dad and my stepmom," said Warren. "My sister's in the house, my mom went up to the power plant yesterday to get some groceries." I moved closer, climbed onto the tailgate, and got down in the dirt so we could talk. "When did you come here from Hoboken?" "Yesterday morning. Lived in Hoboken for 20 years." "I haven't seen Hoboken in months." "Don't worry. We'll manage. We'll fix this." I had not considered how broken we would be after travel on dirt roads which were too narrow for even a car. I nodded. I had not considered how broken
