I am using the inbuilt function MediaPlayer.create() to play a video. But unfortunately it is unable to load the video from any other location. There are multiple videos saved under the /sdcard/ folder. I want to play those videos from that folder. I have tried MediaPlayer.create() function but it is not working. Is there any way to achieve it? A: When you create an instance of MediaPlayer and pass the media file url to it, it does not care where the file is located, it will just play the file. It will not even read that file from SD card or any other location. If you want to load the video from SD card, you need to use PlayerClip class which is available in the android.media.MediaPlayer package. Here is some code to get you started on that: MediaPlayer mp = new MediaPlayer(); String myPath= Environment.getExternalStorageDirectory().getAbsolutePath() + "/myfiles"; File path=new File(myPath); URL pathU = new URL(path.toString()); mp.setDataSource(pathU.getPath()); mp.prepare(); mp.start(); Please note that the mp.setDataSource() will try to set the path of the video file that the user has stored in SD card, but if you want to use a video file that is located in application storage, then you need to use the code like this: MediaPlayer mp = new MediaPlayer(); String myPath= Environment.getExternalStorageDirectory().getAbsolutePath() + "/myfiles"; File path=new File(myPath); mp.setDataSource(path.toString()); mp 0cc13bf012

Thermodynamics An Engineering Approach is a Private textbook subscription service that provides professional private courses to our students. Our students are at the forefront of their career and are learning from the experts in their own field. Offering the highest standards of academic quality, the instructors are the most respected and successful industry professionals in their field. Our talented teaching staff specialises in: engineering, science, maths and business. Our courses are highly skilled and technologically advanced, providing our students with relevant, real world industry knowledge as a result. Every year, hundreds of students move across to our platform and benefit from the high-quality courses and industry relevant topics. With flexible start dates and times and a student flexibility of this kind, only you can truly gain access to the best. All our courses are highly detailed, with the students learning in an interactive way, and there is a wealth of feedback and discussion from our students' peers. This is a Web-based Course, which is perfect for a customised, flexible study experience, regardless of your location or schedule. You will be able to choose courses that best match your goals and study requirements, and all the course material is provided to you via the Web. The Learning Style Analysis, Personal Responsibility, Design and Improvement (LSA, PRDI)® is a powerful tool that assesses the unique learning strategies, support needs and academic style of each learner. The LSA has been proven to be highly effective in identifying instructional preferences of all students: Solutions Manual for Thermodynamics: An Engineering Approach 9th Edition Yunus A. I have the following code to copy some files using Join-Path: \$updates = "\\Server\Date1\Dir1\Dir2\Dir3\Dir4\Dir5\Dir6\Dir7\Dir8\Dir9" \$updates = Join-Path \$updates "\*" (Get-ChildItem \$updates -Filter "\*.txt") | Copy-Item -Destination "\\Server\Date2\Dir8\Dir9" The error I get is: Copy-Item : Cannot bind argument to parameter 'Path' because it is null or empty. At line:2 char:1 + (Get-ChildItem \$updates -Filter "\*.txt") | + ~~~~~ + CategoryInfo : NotSpecified: (:) [Copy-Item], ArgumentNullException + FullyQualifiedErrorId : ParameterArgumentNullException,Microsoft.PowerShell.Commands.CopyItemCommand I've tried all permutations of passing the value as a string, as a semicolon separated array, as a hashtable, and as a parameterized array. I've even tried using a variable assignment to a single value: \$updates = "\\Server\Date1\Dir1\Dir2\Dir3\Dir4\Dir5\Dir6\Dir7\Dir8\Dir9" \$updates = Join-Path \$updates "\*" (Get-ChildItem \$updates -Filter "\*.txt") | Copy-Item -Destination "\\Server\Date2\Dir8\Dir9" That also throws an error: Copy-Item : Cannot bind argument to parameter 'Path' because it is null or empty. At line:3 char:1
