Wounded (2004), directed by Peter & Michael Cope, was the debut feature by American film director Peter & Michael Cope. The film stars real-life model-actress Michelle Yeoh as a Chinese drug smuggler who is injured at the Assassin's Creed IV: Black Flag Guide: The Lost Fleet - The Sea of Ghosts Review [...] If Black Flag is a struggle to survive, then one of the highlights of the game will be the Abandon Ship mission, a boat ride through the storms. As a storm approaches, there is no need to worry because Black Flag can be helped out with a customized A.T.S. system that enables you to board enemy ships that were not technically within the playable area. This works with the Syndicate Ship Master, an event that should hopefully be an alternative to rescuing ships from the Black Flag Ship Yard. [...] So your ship has taken damage, and the crew is dead. It's time to fix things. The options you have to fix broken turrets and sails don't necessarily fix the ship as you know it, but that's not something you need to worry about. No, your first concern will be ensuring you have enough food for the journey. A new island will appear between each of the Black Flag Missions in the Sea of Ghosts, but you can only find new food resources there when you are in the tempest. The only way to get to the new islands is to use the Omerta System, which is a new procedure that will allow you to invite another player to your temporary base. At first, I found this system annoying because there is no option to indicate that you want to form a party with someone that isn't on the island, but once you get a hang of it, it is a massive power-up. Without your own ability to form a party, and in the rain, the chances of finding Omerta stations are slim to none. But you know what that means: It's time to head out into the Sea of Ghosts.
