of three different therapeutic modalities according to the extension of the tumors and the age of the patient. Retrospective analysis of 229 patients]. Surgery was indicated in 209 cases (88.2%), chemotherapy in 12 cases (5%) and radiation therapy in 8 cases (3.4%). The surgical series included 19 cases with bronchogenic carcinomas (9.8%), 13 with gastric cancers (5.1%), 80 with adenocarcinoma of the colon (37.0%), 60 with hepatic malignancies (26.7%), and 37 with other cancers (17.2%). The results show that in the homogeneous group of patients with colonic cancer, the surgical curability varied significantly according to the extent of the tumor. The prognosis of colonic cancers whatever the type (adenocarcinoma or mucinous carcinoma) was in consequence of the age of the patients. The 5-year survival rate varied from 27% in patients younger than 70 years, to 12% in older patients. The survival rates of gastric and hepatic malignancies did not vary according to the age. The survival rate of bronchogenic and other cancers has not improved in recent years. The chemotherapy technique, the dosage of the drugs, the weekly intervals between injections, the number of cumulative cycles, and the number of injections in each course are significant factors determining the efficacy of the treatment. The radiotherapy is considered only in advanced and disseminated

Disclosure of this new title is always a big moment for a studio, especially for a new indie studio. As its been pointed out in the past, the horror genre has seen a boom in recent years with titles like Amnesia: A Machine for Pigs and Amnesia: The Dark Descent continuing to gain wide popularity. So is Haunted Shores all the same? We asked the developer Aaron Haag as he prepares to set sail with the single player tale. Interview With Aaron Haag, Creator of Haunted Shores The Year Ahead

Aaron Haag, who has released music with the acclaimed alternative rock band Breakthrough, but prefers being left alone in a comfortable space to play music in, is currently enjoying the Indie/Horror revolution. As the lead developer of Haunted Shores, Aaron is poised to make history as the first independent developer to release a horror game for Playstation. GameGuide: As a new indie developer, what has been the greatest challenge of creating the game? Aaron Haag: The development of Haunted Shores has been an amazing journey! It's been a great learning process. There have been times when I thought, "I don't know if I can do this." I'm excited to continue building this game and seeing it in the hands of players! G: How is the horror genre growing in popularity now? What's your

---

take on the current climate? AH: My opinion on the state of horror is: It's better than ever. It's easy to see more horror games coming out than ever before. Sure, there are a few issues. The marketing machine works much better for the AAA games, so the horror market is skewed toward big budget games. Also, developers are still very skeptical of making horror games. One of the reasons for that is the horror genre is still a novelty for the industry. It's like any other genre; we have to prove to the industry that horror games are not for wimps! G: What can you tell us about the future development of Haunted Shores? Do you have plans to expand into other genres? AH: I would love to expand into other genres. We've had some ideas of things we would like to do that fit into the horror theme. For instance, we would love to make an adventure game in the style of Indiana Jones. We've got a whole list of

**[Week 2] The Paizo official Blogcast for the return of Dragons of Despair is now up on Gobbo's Hat! I'm comfortable saying that this is the kick-ass edition of that series I've wanted to see for a while now. It's rare that the results of a campaign are as evident, right off the bat, as they were the first time we play that DDO campaign. The descriptions woven between the characters are already comic-book quality, and the audience is already hopping in place as the action unfolds. It's also interesting because the first time we played the second to last adventure, there was a bit more beat-back-and-burn attitude to the action. There was a fair amount of grumbling from the players about frequent punks. This time around, none of that was even uttered. As you get to know the Baron through his character description, so far it sounds like he is on your side of the law (no pun intended). The branding of DDO is already attracting like-minded people, and there's a pretty high likelihood that that trend is going to continue here. I'm genuinely curious to see what will happen to the campaign eventually. Will players stick around and get invested for the long-haul? Will they find something that excites them in the rest of the campaign? What looks like a great glimpse into a possible future is tough to imagine. Oh, well. jeff- We have very limited slots for now. b.fox- I think we have plenty of slots. jeff- well, obviously that stuff is going to be very tight at the outset, but if we both agree we're then going to be far too busy with things we love and can't ignore? one of us- You already have. jeff- All right, I think that wraps up the first part of the presentation on the Paizo Blogcast. abhiram- Who will be the first two episodes? jeff- it's going to be Fox and one of us. abhiram- That's ludicrous! jeff- Ha, well, true. Thomas Nelmsen- First! [we'll be doing a few voice things on the show] abhiram- I've heard**

season I guarantee you that the Heisman will be given to Mike Evans. However, quarterback play is the biggest factor in a team's chance at winning a national championship.
