Videos: Sagem fast 3304 v2 firmware and software.Q: Is there a way to get a list of all iam user profiles in Linux through shell? I am a new Linux user, and I would like to know, in a "batch" way, if there's a way to get a list of all IAM user profiles in Linux through shell. Now we are using AWS for our development. We have several IAM users, with various permissions. With the help of the AWS console, we now have a nice list of all IAM users, but I would like to get all of them from shell, for doing some other stuff (like: create folders for these users, encrypt/decrypt some credentials...). Does anybody have an idea about that? A: You can use `aws ec2 describe-security-groups` command to find all EC2 groups (and by implication, the users) for which you have permission. Here is an example (run with `sudo`, of course): `aws ec2 describe-security-groups --group-ids "sg-70a4c7a1, *` Example output: { "SecurityGroups": [{ "GroupId": "sg-58bc5f86", "SecurityGroupIngress": [{ "IpProtocol": "-1", "FromPort": "-1", "ToPort": "-1", "CidrIp": "0.0.0.0/0"
