including new missions, more weapons, and much more. User Reviews Reviews for Watchtowers - Game of the Month, February 2013 (73 reviews) 88% Beautiful graphics, gives the game a very realistic & light hearted look. Game play is mainly through craft and stealth than fighting. It is a game of the month for me, not bad for free! This game is awesome. It can be played offline, so you dont have to be connected for the entire game. The level of graphics are amazing, with awesome graphics for all of the items. The game play is extremely fun, but not a lot of challenge, not a lot of difficulty is needed. This is a game that can be played by any person. The only reason I gave it less than 10 is because of the mous. You can play this game offline, so no need to be connected to the internet! This game is absolutely a game of the month for me! I love the game Watchtowers! The graphics are beautiful and the sound effects are wonderful! I love the upgrade system too. It's very simple to earn the money and purchase new upgrades. I recently tried the demo version of Watchtowers. I have to say that this game is worth investing in. It has a unique and original storyline and you can stay offline and play your game at anytime. This is really a good game! You have to start by earning the money to buy the upgrades and also your weapons will break. It can be quite annoying at times trying to break

Don't forget that Notepad++ makes a really simple way to add icons to your computer, including Mac. But can it import...the icons, well, specifically the folders? When I open up my Notepad++ installation folder, I only see a few folders with the following names: .chm, .wav, and .dir. I would like to see a documents folder to appear under the Documents subfolder of the data folder. If possible, this shouldn't be a huge deal, but I would rather just get a better reading while exporting the text to Dropbox.
