When Larry can't impress his girlfriend during their weekend getaway, Larry embarks upon a quest to find a new tail. His quest takes him to a number of women, but little does Larry realise that he is looking for the wrong kind of girl... In this game, you can either play as Larry or the girls. If you are Larry, you may see one of the girls in the short cutscenes between levels and who she is depends on your achievements. If you are one of the girls, you must wait for a phone call to go find Larry. Depending on the girl, she may either give Larry a special kiss goodnight or tell him to take a hike. Like Larry in previous games in the series, Larry has no control over how the girl acts, but if you get the right endings, he can get a kiss from her. The game has 5 difficulties, each with 3 levels. The difficulty is determined by the number of the phone numbers you have collected in the last level. For example, if you have collected 5 phone numbers then Larry will start the 5th level in difficulty 5. On the other hand, if you have only collected 2 phone numbers then Larry will be forced to continue on to the 3rd level in difficulty 2. Choose your own adventure with the Leisure Suit Larry series. Key Game Features: 4 Different Characters: Play as Larry, Jill, Maxine or Lucy 4 Difficulty Levels: The game has 3 different levels of difficulty to select from. High, medium, low. 4 Game Modes: Play for the Night, Play for the Day, Hide and Seek, Mini Game 2 Skill Levels: Choose to play at Skill Level 1 or Skill Level 2 5 Star Ratings: 1-5 Star Ratings to help you determine if the game is worth playing 9 Hidden Objects: locate various hidden objects throughout the game. 9 High Score: Compare your high score with the high scores of other players from around the world. Various On-Screen Messages: with what's Larry thinking in the intro Fully Animated Intro and Outro: Help Larry with various characters and then have fun with the fully-animated outro A working hypothesis for polyoma-derived virus-induced tumors. SUPAPLEX UNIVERSE! This series of games can captivate you for months or even years, that's why we have named it - SUPAPLEX UNIVERSE! SUPAPLEX (Classic) is our first game in the series - legendary Supaplex! SQUARES One of the most unusual Supaplex of all! Its levels are in the shape of small squares on the game board. The whole square is entirely visible and the level does not imply long passing. However, each of them will require quick thinking and fast reactions! On the whole, this game doesn't contain very large and complex elements and can be used by beginners of the Supaplex world. But at the same time we think it may be of interest to professionals! In total we can say - it's a game of UNUSUAL SQUARE LEVELS! HARD Complexity and speed! Certainly, Supaplex HARD will require greater preparations! There are many tasks that need relatively long planning and quick responses. New ports have been added here, that switch on gravity and invisible walls. If you have managed to accomplish Supaplex (Classic) successfully and you are eager to continue this incredible adventure with a new level of complexity and passion, then Supaplex HARD is what you need. What can we say about Supaplex HARD in plain words? It is COMPLEXITY AND SPEED! GO! This game is for advanced players of the Supaplex world with a lot of new adventures! A new level of complexity and enthusiasm! There are many levels where one has to think a lot, but the largest part of the game requires good reactions. That's why its moto is: RUN! BUT DON'T FORGET TO THINK! THINK! This game is for prepared players of the Supaplex world with many new adventures! A new level of sophistication and enthusiasm! Although Supaplex THINK! contains many levels that require good reaction, in general, it is more focused on planning and thinking through action. Therefore, we say: THINK! AND IF YOU NEED TO - RUN! WOW! This game is for professional players of the Supaplex world with a lot of new adventures! A new level of complexity and passion! It needs good reaction! It requires a lot of thinking! We simply can say: FOR THOSE WHO ARE NOT AF c9d1549cdd

Nice game with some fun mini-games like the Go-cart, Jumper, and the new Slingshot. The game is very fun for all ages and most of the mini-games can be played if you choose to let your child play in the Parent Mode, which is a good idea. Also, the challenging Putt-Putt courses are fun to play. The Main Game: The game is very well designed, is fun to play, has many mini-games, and the graphics are good for the Apple II. Characters: The characters are very cute and are the same in every game you play. They are not your typical Characters you may be used to. I think this is done on purpose to keep the kids more interested. The voice-overs are great and add to the game. Playability: This game is fun and you really feel like a kid again! If you have never played "Putt-Putt®" before, you should try this game out. Remember, it is also designed for toddlers so it may not be as difficult for the older kids. Graphics: The game is well made and the graphics are bright, fun and colorful. The game looks like a cartoon and appeals to the kids! Replay Value: Unlike other games I have played this time, I can see myself playing this game again and again. There are many mini-games to play, ranging from games like the Go-cart to Slingshot, and there are several different courses to play on. There is a good variety of courses to choose from. The game only takes about 10 minutes to play through and there are so many different games to play, you will find hours of fun for your time and money. Lasting Appeal: This game has many hours of fun to play and is easy to pick up and play for children. I can see myself playing this game for a long time. Overall: This is a classic game, perfect for toddlers, preschoolers and elementary school aged kids. This is a game you will enjoy for a long time. Kids will be able to play this game for many years to come and enjoy. Reviewed by a child. The graphics are excellent

What's new:

! If you're one of the many who think "spectacular phone" is all flash, all jewelry, pure Rolex - well, the Samsung Galaxy S has 18-carat gold-plated bodies and has been compared to Play-Doh on a kid's playground. Yes, it's a magnificent sandwiching of glass and steel, that in turn is sandwiched between the metal rim and its thicker bottom frame, all resting on a beautifully chamfered plastic body. It'll be a long time before it can quite rival the original Apple iPhone 1.0, but it'll do just fine for a lot of people. Samsung tried (and did) to show us their product in all its glory - and caused lots of people to cringe. True, it's never been as pretty as the original. However, the Galaxy S is smarter than its forebears in appearance --even if that's harder to see. And it's the real deal. A real phone that does everything you might want it to do, a phone with a full QWERTY keyboard, running with Android 2.0, Ice Cream Sandwich. Where's Super Mario at? What's that? No, I don't want to speak to you in video game terms. Maybe a little later, I guess... Now we get right to the meat and potatoes, like I've been doing all year with my smartphone reviews, though the preview has been updated with a new look and some bells and whistles. This is Android 2.0, I'm talking about. It's said to have lots of changes that will make all your old memories of Android 1.x (and even of 1.5) long forgotten. And Android 2.0 is all about user experience. Samsung has been building software and watching it with its eyes, until now, actually pretty discretely. After all, it's facing off with the US iPhone maker, Google and the rest of the world in the so-called "Innovation Derby", so it's not exactly kicking the tires on many roads right now. However, it's been building Android and offering innovations for almost a year now, and we've made some observations ourselves - and sometimes discovered a sleeper idea in the activities which reared a head in the last version, called
