LightCA Torrent (Activation Code) Free Download [Win/Mac]

It was born in order to fulfil the need to make creating a Certification Authority as easy as possible, and so it can be embedded in any program. I have created LightCA, so that I don't need to create my

own local CA and leave my machines vulnerable to man in the middle attacks. LightCA also allows you to create and export your own certificates, as well as allowing you to create your own profiles of how other certificates should behave. Features: ✓ Embedded CA ✓ Certificate signing, request/revocation list creation ✓ Certificate revocation checking ✓ Certificate generation ✓ Certificate printing ✓ Certificate search and comparison ✓ JSON and XML export ✓ User interface validation Incompatible Features ----- The following features were not included: ✓ Certificate comments ✓ Certificate expiration ✓ CRL generation ✓ Self-signing ✓ Certificate/chain expiry ✓ SSL/TLS/HTTPS test client ✓ Certificate import/export ✓ Chain generation ✓ Certificate preferences ✓ Expiration preferences ✓ Certificate signing preferences ✓ CRL generation preferences ✓ CAK generation preferences ✓ CAK signing preferences ✓ Other preferences ✓ Certificate chain validation ✓ Diffie Hellman/DH key exchange ✓ Diffie Hellman/DH key agreement ✓ Digital signature/signing ✓ RSA key agreement ✓ ECDSA key agreement ✓ RSA signature ✓ ECDSA signature ✓ X509 attribute format ✓ PEM format ✓ SSL/TLS test server ✓ X509 key usage ✓ Extended key usage ✓ Certificate PIN ✓ Certificate password ✓ Extended certificate verification ✓ Update notification ✓ Generic access method ✓ Remote trust ✓ OID configuration ✓ CRL type ✓ SAN extension ✓ CSR/certificate creation ✓ CRL request retrieval ✓ Certificate chain retrieval ✓ Certificate thumbprint retrieval ✓ Certificate signing ✓ Certificate search ✓ Certificate expiry ✓ Certificate revocation ✓ SHA-1 hash size ✓ SHA-256 hash size ✓ SHA-384 hash size ✓ SHA-512 hash size ✓ AES key size ✓ RSA key size ✓ RSA key exchange ✓ b7e8fdf5c8

System Requirements For LightCA:

As with any game, the bar is set very high for what we call 'core', the basic requirements that you need to be able to play the game, not that you can't play the game, but that you can't play it without extreme frustration and discomfort. The game has been tested with Ubuntu 11.10 and above. The version of our software that is playable can be seen here:
