Players are equipped with a "Be a Pro" sensor on their chest; when close enough, this sensor reads the player's vital signs to gain insights like body temperature and heart rate. Players will have access to a similar set of statistics found in FIFA 17, including minutes played, goals, assists, crosses, most appearances, and so on. Ratings are based on either core attributes (passing/tackling, shooting, and heading) or game-specific attributes (Brennanancing™). The full 360 video of the seven-a-side fitness test is included in the FIFA Ultimate Team Collection.

Q: Cannot uninstall software that is included in Office 2013 DVD, but doesn't come pre-installed on my PC This is a follow-up to "cannot uninstall applications included in software bundle for 1 TB hard disk". I received the Microsoft Office 2013 Upgrade DVD (1 TB) from my employer. It includes the Office 2013 application and the SQL Server 2012. However, the DVD I received only has one of the two applications installed. But in the Office 2013 options screen, the installer tells me that I need to uninstall Office 2010 "or later": I can't find a way to remove the "uninstallable" software. Or even to find out what the installer chose to install. I tried searching for an uninstall.exe in the \Setup folder on the DVD. I found this file: HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Office12\Setup\Microsoft12\AllProducts\Uninstall\ dword_144185809:1 But it is also an uninstall. I then tried to run the uninstall.exe from the DVD. But it says it can't find the Office folder. In the end, I was able to get rid of all of the applications except for SQL Server. I now have a solution that I couldn't uninstall. I'm using Windows 7 Home Premium x64 SP1. This is a machine for my personal use, so I can't imagine that I'm going to receive Office 2013 any time soon (in fact, I can't imagine anyone getting Office 2013 at all). Any way to make the Office 2013 install as a clean Office 2013 install, instead of re-installing Office 2010? A
