VBA AutoCAD's VBA is an Object-Oriented Programming language allowing creation of macros for automation. The Automation Manager allows macros to be created from scratch or imported from a variety of sources. Currently a number of third party vendors offer AutoCAD plugins for automation. The AutoCAD VBA environment allows macros to be developed using Microsoft Visual Basic. Autodesk VBA Plugin Development Kit (DVDK) was released by Autodesk in early 2006. It is an open source licensing alternative to the Autodesk VBA Plugin Development Kit for download and experimentation purposes only. AutoCAD also provides a .NET API which supports integration with C#. The .NET components of AutoCAD are available on the Microsoft Windows Operating System, Windows Vista, Windows 7, Windows Server 2008, Windows 8 and Windows 10. AutoCAD Online, an online web-based version of AutoCAD, was announced in June 2007, and provides access to AutoCAD's user interface, tools, and drawing data. In addition, AutoCAD has a general-purpose native executable API, which supports scripting and automation. This API is currently accessible on the Windows operating system only.
