Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Samuel Irvin is a naval officer on the USS Theodore Roosevelt who is assigned to the ship's combat information center. During a battle, he is called upon by the carrier's captain to lead a counter-attack on a nearby enemy ship. Facing heavy enemy fire, he is unable to return fire. His plane crashes at sea. However, as he is lost at sea, he is rescued by the enemy ship and taken to its captain. The captain reveals that he and Irvin had been in contact and ordered Irvin to fire at the USS Saratoga, whose launch of an unarmed Tomahawk missile will lead to the ship's destruction. Despite orders to the contrary, Irvin disobeys and brings the Saratoga to a stop. His actions have left him emotionally scarred, and his father agrees to have him sent to the U.S.S. Constellation, a decommissioned nuclear submarine in reserve. He is informed that he will be the senior officer and command the ship. Famed artist and animator Hayao Miyazaki has developed a new feature on the Studio Ghibli website that allows visitors to look at his works, some of them unfinished and incomplete, as if they were real-life room-scale VR simulations. The feature launched with 15,000 pieces, with more available for visitors to discover. The organization also provided interactive screens to be displayed on museum walls. An immersive film called Workboat is also available. Adults with attention deficit hyperactivity
