Once again, we require a user to upload a picture of his ID. Apk v1.2: April, 1 1999 Added torrents link in the game Description Special thanks to everyone who helped me writing the article and also for emailing me in the comments. The guy has been at work for over three weeks on a new hack and a bunch of fake sites. So all hacks are fake and he must know that. Share this article. Its pretty good stuff to read. Get it all at one place. Maybe hes double dutching us? He got caught and now he wants to laugh at us. But hes just too late.

There are thousands of people who read this article and download APK/Actionscript v1.2. As for getting real human verification, I dont see any way. He could use my old screen name and image, but that means I would get banned. I could put in a new image, but that means I would have to go to several sites and create a new account.

He could do a twitter bot and fake me out, but thats not a good idea. He could upload some site of his own, but then he would have to pay for the bandwidth. He cant run the bot 24/7, so it would stop working and he would have to recreate it. He could always wait until we find out how to do human verification and get a list of compromised accounts. Perhaps then, but what good will that do him? Anyone who has played this hack knows how amazing it is. We have not even made any APKs for this. Hell, we probably only have a few players as of April 1, 1999. We dont know how to verify human accounts. We dont have a money tree to give this guy. He cant get us or any of our computers. He cant infiltrate our site and look for the data. He cant access the databases. He cant leave compromised code on our server. And its not like he doesnt know any of these things. All these things make it pretty clear how he got the information. It has been concluded that its not the real thing and its just a troll. So either way, we are screwed. Here 804945ef61
